UNLOCK LIMITLESS LEARNING

Research shows that personalized learning can maximize student success and help prepare students for tomorrow's fastest-growing jobs.¹ To enable personalized learning at scale, teachers need both the tools and the time to put students at the center of their own learning. With easy-to-manage technology from Microsoft Education and affordable Windows 10 devices, school IT can deploy devices and apps that support collaboration and individualized learning for all students, free up as much as 30% of teachers' time², and keep data safe with built-in security and privacy features that address the most rigorous security and privacy demands of our customers. Microsoft Education helps deliver personalized learning for every student with devices built for the classroom and beyond starting at \$219 for notebooks and \$299 for 2-in-1 laptops with touch and Windows Ink.

WHY IS LENOVO EDVISION PROGRAM RIGHT FOR YOU

Thanks to technology, the way students are learning is changing. Many of today's students will enter into careers that have yet to be imagined. To better prepare students to excel in the digitalized world, first education institutions must first transform the learning environment to allow students to grow and hone their digital skills.

Transformation is not without its challenges. In education those challenges are both technological and human. Defining a digital transformation path, digital integration, integrative CIO and data security and privacy require a cohesive strategy for transformation to be successful. On the human side, the digital literacy of educators and evolving the learning model must equally be addressed.

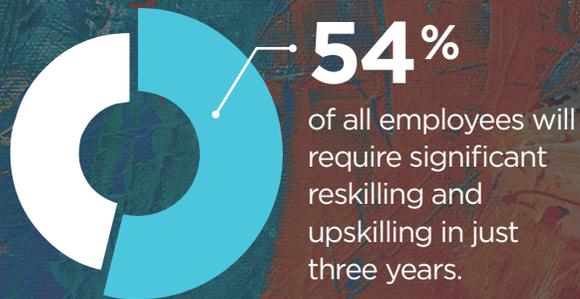

At Lenovo, we believe that transforming education is critical for society's development. A recent Lenovo study found that students perform better academically in schools which have introduced the use of smart technology in everyday learning. These technology solutions allow students to experience immersive, active learning.

We are proud to provide the technologies that engineer smarter classrooms for students. Through our close collaboration with experts in education and our own technology industry peers, we aspire to continue being a leader in best-in-class learning solutions for the classrooms of the future.
